

# We help you meet the specific needs of EUV lithography.

B-Cool Eltec 502

**Andreas Neumann**

Segment Manager Electronics  
Blaser Swisslube AG

**Outgassing cube produced in our technology center**

For the development of safe and reliable products and processes

Our Liquid Tool. Your Success.

# Meets the requirements of quality control and production.

## B-Cool Eltec 502

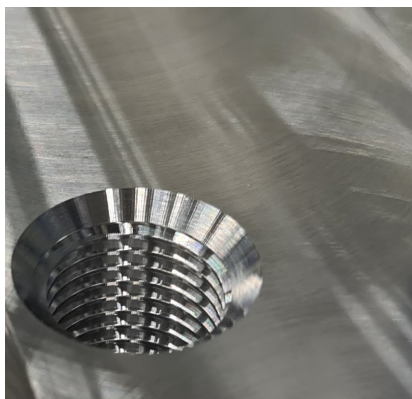

### Fulfilled cleanliness requirements

- Excellent aluminum compatibility – even with sensitive alloys such as Al 5083
- Formulation without critical HIO elements such as P, Si, Sn and Zn
- Low mineral oil content helps fulfill RGA specifications

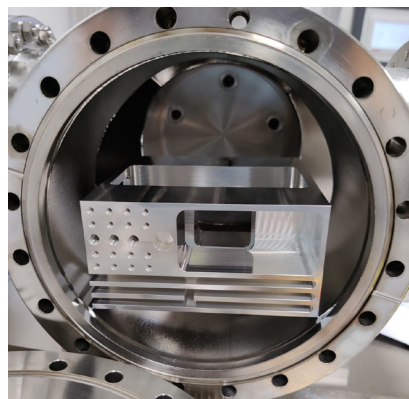

### Satisfied machine operators

- Optimal machine compatibility
- Clean parts and machines thanks to excellent rinsing behavior
- Suitable for both soft and hard water

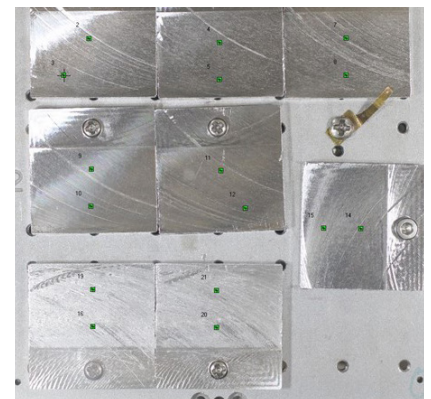

## Specially developed formulation for machining workpieces for EUV lithography

**Surface:** spotless even with sensitive aluminum alloys

**Outgassing:** helps fulfill RGA specifications

**XPS:** no critical HIO elements

### Profit from our unique Liquid Tool™

Productivity, economic efficiency and machining quality are factors that critically depend on the choice and the quality of your metalworking fluid.

With our profound know-how and experience, customized services and excellent products, we help you fully capitalize on the potential of your machines and tools and turn your metalworking fluid into a key success factor – a Liquid Tool.

**Test us. It's worth it.**
