

“It keeps running and running and running.”

Vasco 6000

Hubert Westhauser
Machining expert
with 45 years experience
Blaser Swisslube

Developed for the demanding conditions of general machining.

Vasco 6000

Ester-oil-based coolant with high proportion of additives

- Resilient, stable, universally applicable product with robust performance and long tool life
- High machining volume and best surface quality even for difficult operations and materials
- Clean parts and machines thanks to excellent rinsing behaviour
- Economical due to low consumption
- Good human and skin compatibility (free of bactericides)

Broad range of application

- For general and high performance machining of titanium, nickel based alloys, alloyed steel, steel, cast steel, cast iron and cast aluminium alloys
- For individually filled machines as well as central systems
- For soft and hard water

Lower tool costs per part

Tool wear after 4, 8 and 20 meters milling in titanium

Conventional coolant

Vasco 6000

Profit from our unique Liquid Tool

Productivity, economic efficiency and machining quality are factors that critically depend on the choice and the quality of your metalworking fluid.

With our profound know-how and experience, customized services and excellent products, we help you fully capitalize on the potential of your machines and tools and turn your metalworking fluid into a key success factor – a Liquid Tool.
