# For combined EDM and grinding of hard and super hard materials.

## Blasogrind GTE 5

- High removal rate with hard and super hard materials such as PCD, CBN, ceramic cermet and tungsten carbide
- Excellent surface quality
- Prevents the release of cobalt when grinding tungsten carbide
- Minimal mist and vapor formation for a pleasant work environment
- Colorless and transparent for a clear view of the spark condition
- GTL-based oil for long-term oxidation stability and good machine compatibility

### For all major EDM grinding systems

- Low viscosity and high flashpoint ensure optimal spark gap, minimized electrode wear and high stock removal also with fine grid wheels
- Ultra-fast air release creates an optimal ionized channel and dielectric strength

Grinding machines equipped with Studer WireDress

Anca EDG: PCD rotary eroding and carbide tool grinding in one

Agathon grinding machines equipped with PowerGrind technology

### Product data

Viscosity at 40 °C	5 mm <sup>2</sup> /s
Flash point	155 °C
Copper corrosivity	1a (3 h at 60 °C)
Color	Colorless (ASTM 0.5)

Note: Suitable for edge and precoat filter.

**Test us. It's worth it.**
