Blaser Swisslube

Aleksander Nokaj
Grinding Director
MasterCut Tool Corp.

Our Liquid Tool. **Your Success.**

For precision grinding – whatever industry, machine or material.

Blasogrind GTM 4

- Performance-optimized formulation
- For a wide range of materials including carbide, HSS, stainless steel, hardened steel, and ceramics
- Minimized cobalt leaching
- Good wetting and rinsing behavior for easy-to-clean workpieces and safe coating
- Good machine/polymer compatibility and filterability
- Excellent aging stability

Gas-to-liquid technology (GTL)

Comprehensive range of tried-and-tested high-performance oils

- Optimal cooling thanks to fast air release
- Colorless and transparent for a clear view of the grinding process
- Odorless for a pleasant working environment
- Minimized misting and foaming

For a wide range of industries and grinding systems

Compatible with a variety of precision grinding machines and filter technologies (e.g. centrifuge, edge, cartridge)

Medical implants and instruments

Cutting tools

Forming tools and ceramic dies

Product data

| | |
|--------------------|----------------------|
| Viscosity at 40 °C | 4 mm ² /s |
| Flash point | 147 °C |
| Copper corrosivity | 1a (3 h at 60 °C) |
| Color | Colorless (ASTM 0.5) |

Test us. It's worth it.
